SUMMARY

I chose Computer Science career path later than most, but stuck with it because I found myself enjoying the daily challenges one faces when designing/implementing software. Working physical labor/retail jobs was a strong motivator/influencer to pursue a career path that I'd ultimately enjoy working in and here I am today. Self-educated, University approved, ready to apply.

COMPUTER SKILLS

Languages

- Day-to-Day: Java, C++, Python

- Experience with: C, JavaScript, HTML/CSS, Pygame, Android

Software

- Database: MySQL, phpMyAdmin

- Platforms: Linux/Unix, Microsoft Window 10

- IDE: Eclipse, IntelliJ, Pycharms, Android Studios

COURSE WORK

Python

- Learned and applied Pygame modules to create a music driven snake like game. Collaborated with former graduate student to implement algorithms for determining a songs BPM (beats per minute).

- Strong Object Oriented Programming from previous Java experience

Web and Internet Programming

- Developed database-driven, multi-tiered, interactive web applications

- Applied Model Controller View. Java, JSPs, phpMyAdmin were utilized in the web applications.

- Skill implemented to create personal site for portfolio

Java

- Utilization of Java APIs to create UX/UI interface for projects

- First language to motivate my drive for programming.

- Strongest programming background and most preferable to work in.

EDUCATION

California State University, Los Angeles   2014-2017

Los Angeles, California

- **B.S in Computer Science**
